Customer Quality Complaint Report

Complaint Reference: CC-2026-00154

Date Reported: 12 July 2026

Reported Via: Email

Reported By: Quality Assurance, Zenith Life Sciences

Product & Batch Details

Product Name	Metformin Hydrochloride API
Grade / Specification	IP/BP
Batch / Lot Number	MFH260712A
Affected Quantity	25 kg (1 HDPE Drum)
Manufacturing Date	25 June 2026
Expiry Date	Not Provided
Originating Site / Block	Manufacturing
Impacted Material	HDPE Drum (Primary Packaging)

Complaint Narrative

During incoming quality inspection at our facility, our QC team observed multiple dark foreign particles inside one sealed HDPE drum of the above-referenced Metformin Hydrochloride API batch. The drum itself showed no visible external damage, tampering, or evidence of a compromised seal prior to opening. The affected drum has been quarantined and segregated from usable stock pending investigation. No other drums from the same shipment showed similar defects upon visual inspection, but we are requesting a full investigation given the potential quality impact of foreign matter contamination in an active pharmaceutical ingredient.

We request a formal investigation, root cause analysis, and confirmation of corrective and preventive actions, along with a decision on replacement or credit for the affected quantity.

Immediate Action Taken

Affected drum quarantined. Remaining stock from the same batch placed on hold pending manufacturer response. Photographs of the foreign particles available upon request.
